## 2025 Summer Internship

This summer, our association successfully hosted a 4-week Summer Internship Program focused on two key pillars: education and mentorship. The program was designed to provide interns with a strong foundation in the Surplus Lines insurance industry while fostering meaningful connections with professionals in the field.

Over the course of the program, interns participated in engaging discussions and networking sessions with industry leaders, gaining valuable insights from experts across various areas of the business. These experiences helped expand their professional networks and provided a real-world context for the knowledge they acquired.

In addition to networking, the interns completed a structured educational course focused on Surplus Lines insurance, equipping them with both foundational knowledge and practical skills relevant to the industry.

By combining education with networking, the program is designed to equip interns with both the technical knowledge and industry connections they need to succeed, while also fostering relationships that may benefit our association in the future as we cultivate the next generation of talent for the Surplus Lines sector.
